TECHNICAL DATA SHEET

Blixem Liquid Drain Cleaner

PRODUCT DESCRIPTION

Blixem Liquid Drain cleaner is a reliable and effective sulphuric acid-based cleaner that goes deep in drainage system to reach the source of the clog and completely dissolve it. Whether the clog is in the form of hair, soap scum, grease or any type of residue. It is safe to use in showers, sink turbs as well as septic system, garbage disposals and PVC pipes. It contains chemical ingredients that can be harmful if swallowed or in contact with the skin or eyes. **Do not use this product in stainless steel, aluminum chrome or galvanized steel pipes. it is safe to use with plastic piping.**

DIRECTIONS FOR USE

N.B do not add water directly to the product. The product produces heat when mixed with water, please add the product in small proportions.

- Open all windows in the room where the drain is to be unclogged to allow for proper ventilation.
- Wear your proper protection equipment when handling the product.
- Pour the recommended amount of drain cleaner (about 200 ml) slowly into the drain.
- Wait for about 10 seconds, allow water to flow slowly into the drain. If the drain backs up, turn off the water and wait a bit longer.
- For severely clogged drains where water doesn't flow, slowly pour more product to about 500ml, if the clog doesn't clear. Wait even longer – several minutes to an hour — to give the acid time to work.
- Flush the drain with plenty of water when the clog clears, and the drain begins to flow.

BENEFITS

- It can remove nearly any reasonable clog.
- It is simple to use, readily available in low concentrations.
- It is convenient and economical.
