

ANGELFIRE PRE-WORKOUT

EXTREME ENERGY SUPPORT FORMULA

The specially designed for women pre-workout formula in SSA Pink Series, AngelFire is the front running supplement for women who are looking to take their training experience to the next level. It is already extremely popular in Europe and Australia.

This powerful mix comprises of Glycine, Beta-Alanine and L-Carnitine as part of its main driving components.

Glycine is an amino acid that produces intra-muscular energy which will result in overall training performance enhancement. When combined with the pump and lactic acid buffer effects of Beta-Alanine as well as the fat metabolising and mental focusing effects of L-Carnitine, AngelFire is a force to be reckoned with.

Beet Extract provides both energy advantages and iron levels-very important for women. Ashwagandha limits the negative effects of cortisol, while N-Acetyl Tyrosine in combination with caffeine promotes focus and fat loss.

All these limit breaking qualities combined into a single pre-workout mixture are sure to give you earth-shattering results.

Active Ingredient Content

Serving Size: 2 Level Scoops (6g)
Servings Per Container: 30

	Per Serving	NRV
